

CPVC

DURALIFE

Why use Prayag CPVC Pipes?

Withstands elevated temperatures

Freedom from Toxicity, Odours, Tastes

Cost Effective

Easy to Install

Maintenance Free

Strong & Durable

UV Resistant

Fire Resistant

Good Chemical Resistance

Good Corrosion Resistance

Low bacterial growth

Solvent Cement Jointing

Allowing greater flexure

Food Grade Material

Highly ductile material

Prayag introduces a complete range of CPVC pipes and fitting for all plumbing applications. CPVC is fast replacing the conventional GI pipes because of its numerous advantages and improvement in the production technology, for hot and cold plumbing works. Technically Chlorinated Polyvinyl Chloride (CPVC) is PVC (Polyvinyl Chloride) that has been chlorinated via a free radical chlorination reaction. Various additives like stabilizers, impact modifiers, pigments and lubricants are also added into the resin in order to make the material processable and more durable for desired applications.

Prayag pipes have been developed with a Perfect-fit design to provide leak proof joints to avoid any leakages. Produced under strict quality control and conforming to international quality specifications, Prayag CPVC pipes are available from 15mm(1/2") to 100mm(4"), with two standard dimensional ratios of SDR 11 and SDR 13.5. Both SDR 11 and SDR 13.5 are produced from the similar compound having equivalent physical properties.

Standards & Specifications

ASTM D1784-Standard Specification for Rigid Poly (Vinyl Chloride) (PVC) Compounds and Chlorinated Poly Vinyl Chloride (CPVC) Compounds.

ASTM D2846-Specification for Chlorinated Poly Vinyl Chloride (CPVC) Plastic Hot & Cold water distribution systems.

ASTM F493-Standard Specification for Solvent Cements for Chlorinated Poly Vinyl Chloride (CPVC) Plastic Pipe & Fittings.

ASTM F441-Standard Specification for Chlorinated Poly Vinyl Chloride (CPVC) Plastic Pipe, SCH 40 & 80.

Fields of Application

CPVC pipes and fittings find a vast variety of applications in residential and commercial high rise and low rise buildings, for both hot and cold water applications.

Typical CPVC Testing Results

Parameters	Prayag Duralife	Generic CPVC Pipes processed from Pipes & Fittings	Prayag Duralife Advantages
Vicat Softening	Pass	Fail	Generic CPVC product has continuous problem in hot water lines
Vice Crush	Pass	Fail	Generic CPVC product material is inconsistent which weakens pipe and has high risk of pipe failure
Malfunction Failure at 95°C	Pass	Fail	Generic CPVC Product has less life expectancy
Vacat Softening	Pass	Fail	Higher Vicat Softening temperature makes Prayag CPVC pipes ideal for hot water application
Vice Crush	Pass	Fail	Prayag CPVC pipes have higher load bearing capacity hence are more stronger
Burst Test	Pass	Fail	Higher reading means Prayag CPVC pipes are stronger to to take higher water pressure

THE SUPERIOR HOT/ COLD WATER DISTRIBUTION SYSTEM

When you specify Duralife pipes and fittings, you benefit from the most experienced installation and support network in the industry. Let us help you, specify the pipes, fittings, solvent cements and-installation technologies that meet,your most stringent standards for reliability and performance:
