

UPVC

AQUAFRESH

Why use Prayag UPVC Pipes?

Lead Free

Freedom from
Toxicity, Odours, Tastes

Cost Effective

Maintenance Free

Strong & Durable

UV Resistant

Good Chemical
Resistance

Good Corrosion
Resistance

Low Thermal Conductivity

Easy to Install

Fire Resistant

Solvent Cement
Jointing

Prayag presents a complete range of high quality UPVC (Unplasticized Polyvinyl Chloride) pipes and fittings. UPVC pipes find a wide range of domestic and commercial applications including electrical & telephone cabling, sewer pipes and above all drinking water supply. Made at one of the most modern plant in Bhiwadi, Rajasthan, these pipes are made with precise accuracy using the best of polymer. Having almost double the pressure bearing capacity than the conventional threaded pipes and UV resistance, these pipes are manufactured with lead free material and last for almost a lifetime. The perfect fit technology used to manufacture these pipes, provide leak-proof joints with minimum maintenance and cost.

Feature	Advantage
Safe	Made with non-toxic lead free raw material, Prayag UPVC pipes are absolutely safe for drinking water
Perfect fit	Dimensional precision of Prayag UPVC pipes leads to a perfect fitting that avoids any chance of leakage
More Strength	An additional bearing capacity and higher UV & impact resistance means Prayag UPVC pipes have more strength to last longer
Ease of installation	Prayag UPVC pipes are very easy to install and maintain, that makes handling and installation easy
Hygienic	Prayag UPVC pipes are corrosion resistant, odourless and chemically inert
Economical	Prayag UPVC pipes work out to be much more economical as compared to metal pipes
Environment Friendly	Prayag UPVC pipes and fittings use lead free material

Applications

Due to its high material quality and dimensional precision, Prayag's "Lead Free" UPVC Aquafresh Solvent weld plumbing system is a choice of leading Engineers and Architects. Prayag UPVC Aquafresh pipes and fittings are available from size 15 mm (½") to 110 mm (4") in Sch 40 and Sch 80.

Cold Water Plumbing
in buildings

Water Distribution
Mains

Swimming Pools

Dye Plant, Chrome,
Zinc Plating and
Tanning Plants

Industrial Process
Lines

Salt water line

Aggressive/corrosive
fluid transportation

Sugar, paper and
distillery industries

Prayag Aquafresh systems do not support combustion and are therefore ideally suited for use in buildings and houses, exclusively for cold water pipelines. UPVC must be forced to burn due to its High Limiting Oxygen Index (LOI) of 45. LOI is the percentage of oxygen needed in an atmosphere to support combustion.

UPVC LEAD FREE Advantage

Lead contamination due to PVC pipes is one of the major contributing factors of ground water pollution in India

Lead poisoning has various long-term negative health effects. It is important to identify the sources of such pollution and to devise methods to eliminate the contributing factors.

Sources of lead contamination of potable water supplies & groundwater

- PVC pipes used in sanitation, plumbing & agriculture
- Manufacturing of PVC pipes & products
- Manufacturing of PVC fittings and attachments
- Recycled plastic PVC

As a result of the stringent quality control measures that have been adopted by Prayag ever since inception, our entire range of UPVC pipes are lead free, durable, safe and long lasting. These Lead free PVC pipes are used in sanitation, plumbing and agriculture

Prayag where safety is designed first the - product later. Lasting durabilities by Prayag are synonymous with quality.
